

# Hudson Valley Biogas - Manifesto and Partner Pledge

Version 1.0 | 2025-12-26

## Manifesto

- We are done with the linear story: extract, consume, dump, repeat.
- We choose circular systems that keep value local: energy, nutrients, materials, and jobs.
- We build measurable projects that earn trust - no greenwashing, no hand-waving.
- We design with communities: siting, permitting, and benefits are core features.
- We prioritize environmental justice and workforce opportunity where burdens have been greatest.
- We move at the speed of trust, and we build trust through transparency and follow-through.
- We start with pilots, learn fast, and replicate what works across the Hudson Valley.
- We are a coalition: credit is shared, responsibilities are clear, outcomes are public.

## Partner Pledge

By signing, we commit to collaborate in good faith to advance circular organics solutions in the Hudson Valley. We will contribute our capacity where appropriate, communicate transparently, and support community trust and measurable outcomes.
