

Hudson Valley Biogas - Partner Kit (One Page)

What we do

HVB turns Hudson Valley organic waste streams into local energy, soil value, and community benefits by packaging grant-ready, partner-led pilots (and replicating what works).

The core offer

Grant-Ready Circular Project Package (8-10 weeks):

- Site + feedstock fit snapshot
- Concept design narrative and benefits framing
- Stakeholder coalition plan + letters pipeline
- Grant narrative pack and submission-ready attachments
- Community-facing one-pager + FAQ

Who we need (partner lanes)

- Conveners (trust + outreach): sustainability alliances, watershed groups, EJ orgs
- Municipal sponsors: towns, villages, counties, wastewater utilities
- Project movers: developers, engineers, technology vendors, permitting experts
- Inputs + finance: anchor generators/haulers, grant writers, foundations

How to engage (simple)

1. 1) Choose your lane and point of contact
2. 2) Join the monthly public update (one pilot story + one next-step ask)
3. 3) If you have a pilot candidate, request a 30-minute fit call
4. 4) If fit is strong, form a minimum viable coalition and start the package sprint
